Summary

I specialize in building responsive and scalable web applications using modern frontend technologies such as HTML5, CSS3, and JavaScript.With a strong foundation in frontend frameworks like React and React Naitve, I have successfully delivered impactful projects that meet both client requirements and industry best practices.I have a keen eye for design and a deep understanding of UX principles, allowing me to collaborate effectively with designers to translate wireframes and mockups into pixel-perfect UIs.If you are looking for a dedicated and skilled frontend developer who is passionate about creating exceptional user interfaces, I would love to connect.. Let's discuss how we can work together to bring your web projects to life.

Experience

01/2022 - Present

Front-End Developer

- Developed and designed a Myanmar fonts downloader website using Next.js.
- Implemented intuitive and user-friendly interfaces for the website, allowing users to easily navigate and search for their desired fonts.
- Integrated font preview and download functionality, enabling users to visualize and download fonts of their choice.
- Worked on an e-commerce dashboard project, responsible for developing and designing real-time analytics, sales reports, and inventory management features.
- Collaborated with the backend team to integrate the dashboard with necessary APIs and data sources, ensuring seamless data flow and accurate information display.
- Designed interactive data visualizations, including charts and graphs, to present complex data in a clear and understandable format.
- Developed product listing pages with filtering and sorting functionalities to enhance product discoverability.
- Built a course download application that connects with GraphQL and the Strapi dashboard, allowing users to easily browse and download educational courses.
- Ensured a smooth user experience through intuitive design, error handling, and validation.
- Designed and updated layouts to meet usability and performance requirements.

01/2021 - 10/2021

React Naitve Developer

- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality.
- Developed Android and iOS applications for a leading Japanese coffee shop industry.
- Utilized React Native to build and maintain a mobile application for the coffee shop.
- Integrated Google Maps API to provide location-based services and enable users to find nearby coffee shops.
- Collaborated closely with the backend team to ensure smooth API integration and data flow.
- Implemented features such as user authentication, menu display, ordering system, and push notifications.

Open Source Projects

MM Fonts Hub · https://www.mmfontshub.com
